- Agile Methodologies: Scrum.

EXPERIENCE

Full-Stack Developer

Advisor T.I   **August 2025 - Present，Santa Catarina - Brasil**
- Responsible for developing the company's telecom monitoring system. Experience in Front-End development using Next.JS, Back-End using Node.JS, and PostgreSQL databases.

Front-End Developer

Freelancer   **December 2023 - August 2025**
- Experience in creating responsive websites and systems, focused on performance, usability, and good development practices. I also have full-stack knowledge, which allows me to understand and collaborate with the entire application flow, but my focus is on the front-end.

I.T Internship

Balneário Camboriú City Hall - Ruth Cardoso Hospital   **July 2021 - December 2022, Santa Catarina - Brasil**
- Intern in the IT department at Ruth Cardoso Municipal Hospital, where I worked in various areas, such as technical support, IT infrastructure, system implementation, and software testing. I also actively participated in the development of the hospital's internal system, both on the back-end and front-end.

RELEVANT PROJECTS

School I.T Infrastructure monitoring system

Aprender Conectado Program - EACE
- IT infrastructure monitoring system to assist in its implementation in public elementary schools in northern and southern Brazil, as part of EACE's Aprender Conectado program. Developed using Next.JS, React, Node.JS, Typescript, TailwindCSS, PostgreSQL, and RestFUL API.

Personal Portfolio

lucascordova.vercel.app
- Personal front-end portfolio containing various projects developed. Developed using Next.JS, React, Typescript, and TailwindCSS.

YourStorage

yourstorage-app.vercel.app
- Full-stack cloud storage system project with OTP (One Time Password) authentication system. Developed using Next.js, React, Typescript, and TailwindCSS.
